

3. One at a time carefully place the tulip on the paper that has been labeled with its corresponding number. Tulip #1 on Tulip #1's sheet.
4. Be very careful with the tulips as they bruise easily.
5. Make a line at each end of the tulip. The length you measure between the lines will be the length of the tulip, so mark very carefully the ends of the tulip.
6. Remove the tulip and measure the length.
7. Repeat with all tulips.
8. Repeat each day for five days.

Answer the following questions when the experiment is complete.

## Total Length Grown

Find the total length that the tulip grew by subtracting the length on day 5 from the length on Day 1.

Tulip 1:

Tulip 2:

Tulip 3:

Tulip 4:

Tulip 5:

Grade 4-8 Fill in the following chart recording the lengths in mm, cm and m.  
Convert the measurements.

	Total Length cm	Total Length mm	Total Length M
Tulip 1			
Tulip 2			
Tulip 3			
Tulip 4			
Tulip 5
